

DRAGOON 2013

Round 8

Questions by the University of Illinois at Urbana-Champaign

Tossups

1. **In the platformer of this name, you must battle a pair of disembodied eyes which are surrounded by gold-rimmed glasses in the second level, which is set aboard a train. One movie based on this work follows a hip-hop mogul named Summer G, who reconnects with the love of his life named Sky. On *Entourage*, Vincent Chase stars in a (*) Martin Scorsese adaptation of this work. A series of therapeutic writings that are eventually converted into a memoir are part of Tobey Maguire's alcoholic ramblings in the frame the story of a movie of this name. Elizabeth Debicki, Carey Mulligan and Joel Edgerton are part of the supporting cast in that Baz Luhrmann directed movie, a 2013 film starring Leonardo diCaprio. For 10 points, name this most famous novel of F. Scott Fitzgerald.**

ANSWER: *The Great Gatsby*

2. **As a poor public speaker, this man began the practice of submitting written State of the Union addresses, an act continued until 1917. This person was the only multi-term president with zero vetoes. His navy and war secretaries were Robert Smith and Henry Dearborn. He described the Missouri Compromise as a “fire bell in the night” and said that the (*) “tree of liberty” must be refreshed with the blood of patriots and tyrants. This man called for a “wall of separation” between church and state in his letter to the Danbury Baptists. For 10 points, name this first Secretary of State, the president who signed the Embargo Act and drafted the Declaration of Independence.**

ANSWER: Thomas Jefferson

3. **The book *De Vita Contemplativa* describes members of this religion that lived nearby Lake Maroetis called the *Therapeutae*. Two ancient sects of this religion, which take their name from a word meaning “to set apart” and a high priest, differed in doctrine as to whether spilt water was unclean and whether the dead were resurrected. One theologian of this religious movement argued that the Logos was the creative will of God. One sect of this religion employed “dagger-men” called the (*) *sicarii*. Philo of Alexandria sought to unify this religious tradition with ancient Greek philosophy. Sects of this religion include the Essenes, the Sadducees and the Pharisees. For 10 points, name this religious tradition whose clergy includes rabbis.**

ANSWER: Judaism [Prompt on “Essenes” or “Zealots.”]

4. **These compounds are produced by the peroxide cleavage of an Evans oxazolidinone. These compounds are alpha-brominated in the presence of catalytic phosphorus tribromide in the Hell-Volhard-Zelinsky reaction, and like alcohols, they can be chlorinated by addition of thionyl chloride. These compounds can be produced from primary alcohols with the addition of sulfuric acid and (*) chromium trioxide. The second simplest example of these compounds has a water-free “glacial” form. One of these compounds is reacted with an alcohol in the Fischer esterification. For 10 points, name these compounds which possess a COOH group, whose “acetic” variety is present in vinegar.**

ANSWER: carboxylic acids [prompt on “COOH” before mention, prompt on “acid”]

5. In one scene of this work, its female lead tells a woman that she is pulling her armpit hairs too softly. In another scene, a woman prays to the thunder god Sango to restore her own sanity. Earlier, another of its characters bribes a surveyor to build a railroad farther away from this drama's setting. In its first act, its characters mime a past event in which a photographer's "devil-horse" breaks down. In addition to the "Dance of the Lost Traveller," a (*) "dance of virility" is put on during the course of this play. Divided into three parts, "Morning," "Noon," and "Night," its second part opens with Sadiku informing the second title character that the chieftain of Ilujinle wishes to take her as a wife. Its title characters are the beautiful girl Sidi, and the chieftain Baroka, who pursues her. For 10 points, name this play by Wole Soyinka.

ANSWER: *The Lion and the Jewel*

6. This theorist identified the Parthenon as an example of selection applied to an established standard, and argued that standards were necessary to face the 'Problem of Perfection.' Along with Amedee Ozenfant, this theorist co-wrote the Purist manifesto *Apres le Cubisme*. He emphasized the use of pilotis to suspend buildings off the ground as a hallmark of his style, and the largest of his Open Hand sculptures is in the (*) Indian city of Chandigarh. He also designed a system of proportions based on the human body which he called the *Modulor*. This architect enumerated 'Five Points of Architecture,' which he adapted from a treatise with a chapter titled for 'Eyes that do not See.' For 10 points name this Swiss architect who wrote *Towards a New Architecture* and designed the Villa Savoy.

ANSWER: Le Corbusier [or Charles Edouard Jeanneret]

7. One prime minister of this country carried out the "disentailment", or confiscation, of church lands to finance a war. This country experienced a wave of anti-liberal purges during the "Ominous Decade." During the 19th century, two political parties here agreed to the 'peaceful turn' system by which they would alternate terms in power. (*) Amadeo of Savoy briefly ruled here as king, and it is not Austria, but one ruler of this country issued the Pragmatic Sanction of 1830. That pragmatic sanction blocked the pretender Charles V from taking the throne. For 10 points, name this country in which supporters of Isabella II fought their countrymen in the Carlist Wars, and which was later ruled by the Falange under Francisco Franco.

ANSWER: Spain

8. At one point, the title character is asked to call on his interlocutor in the same way that Heracles called on Iolaus. Its last pages contain an account of four rivers - including the River Oceanus and the Acheron, the latter of which empties into a lake of boiling mud and water. Earlier, this text argues that the world consists of 12 earths. As it opens, (*) Echecrates asks the title figure about a series of events which cause Xantippe to cry sorrowfully. Its title figure is told an argument involving "opposites" to show that a certain entity is deathless. Much of this dialogue, like the *Meno*, presents arguments about how learning is merely recollection of forgotten knowledge and that the soul is truly immortal. For 10 points, name this Platonic dialogue which ends with Socrates's consumption of hemlock.

ANSWER: Phaedo

9. The zombie effect must be accounted for when studying the *remanie* or derived types of these objects. William Smith pioneered the identification of strata using *them*; his namesake principle of succession is essentially an application of the principle of superposition. Biases in the composition of these objects caused by the conditions that lead to their formation are studied by taphonomists. The (*) index type of these items are useful in dating since they are limited to a small region within the geological time scale. George Cuvier formulated his theory of catastrophism by examining these items. Types of these items include gastroliths and coprolites, the latter of which is solidified feces. For 10 points, name these remains of prehistoric life, which are studied by paleontologists.

ANSWER: fossils

10. In one of his stories, a clerk is marginalized from society when his friends learn that he owns a 7-headed hydra. He included "The Bank Clerk's Tale" in his collection *Nine Fair Tales: And One More Thrown in For Good Measure*. One of this author's characters is spared from death because of his hands and later tells Damon and Radius that he can't make the secret of life in a test tube. In one of his plays, the longstanding court case of *Gregor v Prus* is manipulated by (*) Emila Marty, an opera singer who is 300 years old. This author of *The Makropulos Case* wrote a play in which Alquist's creations destroy humanity, including Harry Domin and Dr. Gall. For 10 points, name this author who introduced the word "robot" in his play *R.U.R.*
ANSWER: Karel Čapek [pronounced "cha-pek," but be really lenient.]

11. A passage in this book discusses how James I attacked a form of asceticism by codifying the *Book of Sports*. Another passage from this book states that the elimination of magic led to a form of pessimistic individualism. The third section of this work discusses the origin of the concept of the (*) calling. Talcott Parsons translated one of this work's phrases as "the iron cage of rationality," which refers to social goals that entrap the individual. It analyzes the Huguenots and Dutch Reformed churches to conclude predestination causes men to stress the sovereignty of God's will over all else. This book investigates the rise of the merchant class with the development of certain religious Christian ideals. For 10 points, name this book by Max Weber.
ANSWER: *The Protestant Ethic and the Spirit of Capitalism* [or *Die protestantische Ethik und der Geist des Kapitalismus*]

12. Warning: description acceptable. In a radio broadcast during this event, one speaker expressed hope that "great avenues will open again where free men will walk to build a better society." Operation Fubelt was an earlier American attempt to achieve the same effect as this event, but collapsed following the death of Rene Schneider. Orlando Letelier was held captive and tortured for a year following this event. The primary planner of this event followed it up by ordering the (*) assassination of political rivals by the 'Caravan of Death.' This event culminated in the siege of the presidential palace of La Moneda and either the assassination or suicide of the sitting president. For 10 points, name this 1973 event in which Salvador Allende was overthrown and a right-wing dictator came to power in Chile.
ANSWER: Augusto Pinochet's coup (accept the Chilean coup of 1973 or the 9/11 Chile coup or Pinochet overthrowing Allende before mention, prompt on American intervention in Chile or equivalents, be lenient)

13. One poem by this author asks why Hyde was exiled and why Villiers fell to the assassin's blade after extensively portraying Cardinal Wolsey. That poem by this author, which begins "Let Observation, with extensive view, survey mankind, from China to Peru" was written in imitation of Juvenal's 10th satire. After his mother died, he wrote a short novel in which the poet Imlac, Pekuah, and Nekiyah help a prince of (*) Abyssinia escape the Happy Valley to see the world. This man started *The Rambler* and *The Idler* to promote his critical views, in addition to writing "The Vanity of Human Wishes" and *Rasselas*. For 10 points, name this English author of *A Dictionary of the English Language*, the subject of a fawning biography by James Boswell.
ANSWER: Samuel Johnson

14. This artist often included diagonal stripes running down his subjects' faces in a series of 1980's works on painted bronze, called *Expressionist Head*. His portrait of Madame Cezanne is actually just a diagram with labels using letters of the alphabet. He used oil and Magna paint in his version of *Bedroom at Arles*, which includes Mies van der Rohe-inspired chairs and a green and white floor. Exhausted soldiers with fungal infections are the subject of his (*) *Takka Takka*. His series *The Artist's Studio* features a dumbass saying "I've hooked a big one!" Another painting by this artist of *Look Mickey!* features the text "I pressed the fire control... and ahead of me rockets blazed through the sky..." For 10 points, name this user of Ben Day dots, a pop artist who created *Whaam!*
ANSWER: Roy Lichtenstein

15. One quantity characterizing this process is proportional to temperature to the 3/2 power divided by a “collision integral” according to Chapman-Enskog theory. In a plasma, the presence of an electric field between ions and electrons causes them to experience this process at equal rates in an ambipolar form of this process. The previous quantity characterizing this process is proportional to the product of the mean free path and the mean velocity and it is equal to the square of the (*) step size divided by the time between steps when using a random walk to model this process. The flux of this process is equal to minus the product of a namesake coefficient and the concentration gradient by Fick’s 1st law. For 10 points, name this process exemplified by osmosis where molecules move from regions of high to low concentration.

ANSWER: diffusion [prompt on “mass transfer” or “mass transport.” Before the word “ions,” accept “heat conduction” and prompt on “heat transfer” or “heat transport”]

16. This author wrote “science irretrievably must die” in a dialogue featuring Acasto, Eugenio and Leander. He praises “thy little being [that] came” from “morning suns and evening dews” in a poem that states “if nothing once, you nothing lose, / for when you die you are the same.” His mistreatment aboard *The Scorpion* inspired a 4-canto poem chronicling the abuse of (*) Americans aboard the title vessel. One of his speakers states “Smith with those charms, that must decay, I grieve to see your future doom.” This author of “The British Prison Ship” wrote that “The space between is but an hour, the frail duration of a flower” in a poem about a plant “that dost so comely grow.” For 10 points, name this author of “The Wild Honeysuckle,” and “The Indian Burying Ground,” the Poet of the American Revolution.

ANSWER: Philip Freneau

17. One person with this *first* name employed the private secretary Willem Mons, who was executed for embezzlement. That person established the Supreme Privy Council in order to undermine the Senate and the Holy Synod. One person with this name passed the Edict of Romorantin as a follow-up to the Edict of Amboise, which ended the first phase of the French (*) Wars of Religion. That person with this name convinced Charles IX to execute Gaspard II de Coligny. A ruler with this name obtained the throne by a coup planned in cooperation with Grigory Orlov, and a person of this name from the house of Medici was the wife of Henry II of France. For 10 points, give the common name of these women, one of whom was an Empress of Russia called ‘the Great.’

ANSWER: Catherine [or Yekaterina or Caterina or other obvious equivalents]

18. This composer wrote a piece in F minor that begins with a programmatically description of a châtelaine awaiting her knight’s return from the crusades. This composer of *Konzertstück in F minor for Piano and Orchestra* wrote a piano piece whose orchestration by Berlioz was the basis for Michel Fokine’s (*) *Le Spectre de la Rose*. This composer used Chinese tunes in his incidental music to Gozzi’s *Turandot*. He also composed a pair of clarinet concerti, the first of which was for Heinrich Baermann. His forays into opera includes *Oberon* and a Romantic work in which the protagonist calls upon the Black Huntsman for help in forging his magic bullets. For 10 points, name this composer of *Invitation to the Dance* and the opera *Der Freischütz*.

ANSWER: Carl Maria von Weber

19. APC is one of *these* that controls beta-catenin, and whose inactivation is linked with FAP disease. The malfunction of another one of *these* named VHL leads to Von-Hippel-Lindau disease. Multiple “hits” are needed to deactivate them according to Knudson’s hypothesis. A study on a rare childhood disease affecting the retina lead to the discovery of one of these known as *Rb1*. The inactivation of one of them leads to (*) Li-Fraumeni Syndrome. The proteins derived from these genes play a role in carrying out apoptosis, facilitating DNA repair and regulating the cell cycle, all of which are essential in preventing the onset of carcinogenesis. For 10 points, name this class of genes opposed by oncogenes, one of whose members is p53, the “guardian angel of the cell.”

ANSWER: tumor suppressor genes or tumor suppressor proteins [or anti-oncogenes before oncogenes are mentioned, do not take “oncogenes,” or “proto-oncogenes, which are notably the exact opposite of what we are talking about.]

20. In one appearance, a man tries to dissipate this entity by repeatedly mending the Broken Sword. This location is introduced after a knight witnesses a procession featuring a bleeding lance while on his way to visit his mother. In that story, this location first appears after a knight awakens in a castle that is completely empty, which causes a maiden to chastise him for not asking an important question. In the Post-Vulgate Cycle, this location is (*) created after Balin gives the Dolorous Stroke to a man identified with Anfortas. This term generally describes a Celtic belief that the wound of the Fisher King would induce his kingdom to suffer from barrenness. For 10 points, name this desolate location from Arthurian legend that gives its title to a T.S. Eliot poem.

ANSWER: The Wasteland (prompt on the “Grail Kingdom”)

21. In this campaign, Theophilus Holmes attacked the city of Helena, while Alfred Ellet and William Parsons squared off at Goodrich’s Landing. John Bowen failed to protect the bridge over the Big Black River in this campaign. The northern-born Martin L. Smith constructed the Confederate defenses at this series of battles. Good position for the winning side of this campaign was set up by a Henry Halleck win at the Battle of Corinth. Position by the surrender of Port Gibson and (*) Champion’s Hill. Before meeting in Atlanta, William Sherman and Joseph Johnston’s troops fought in this skirmish. This campaign ended on July 4th, 1863 when John Pemberton surrendered. For 10 points, name this Union victory, where U.S. Grant laid siege to a Mississippi fortress city.

ANSWER: Siege of Vicksburg [accept anything indicating there’s a conflict in Vicksburg]

Bonus

1. Some loser on *Pawn Stars* sold a reproduction of this masterpiece for way less than he should have, and the first title figure of this work was probably inspired by Erasmus's *Handbook of a Christian Knight*. For 10 points each:
[10] Name this engraving which depicts a figure holding an hourglass with serpents around his crown, as well as a man in armor riding a horse with a lance over his shoulder.

ANSWER: ***Knight, Death, and the Devil*** or ***Ritter, Tod und Teufel***

[10] *Knight, Death, and the Devil* is a work of this artist who created *St. Jerome in His Study* and *Melancholia I*.

ANSWER: Albrecht **Dürer**

[10] Durer's painted works includes this diptych, which depicts a group of Biblical figures that represent the medieval temperaments.

ANSWER: *The* ***Four Apostles*** [or *Die* ***vier Apostel***]

2. Name these explorers, for 10 points each:

[10] This Portuguese explorer rounded the Cape of Good Hope and became the first European to reach India by boat. His exploits were fictionalized in Camoes's *The Lusiads*.

ANSWER: Vasco da **Gama**

[10] This Frenchman explored the Gulf of St. Lawrence and the St. Lawrence rivers, and is credited with giving Canada its present name.

ANSWER: Jacques **Cartier**

[10] After getting shipwrecked in the Gulf of Mexico, this Spaniard spent years working as a slave and shaman for various native tribes in Texas and Mexico. He recounted his adventures in his *Relación*.

ANSWER: Álvaro Núñez **Cabeza de Vaca** [accept **Cowhead**, I guess]

3. Changing the strength of this potential changes the number of bound states. For 10 points each:

[10] Name this potential, whose bound states have their energies determined by solving a transcendental equation involving the tangent or cotangent of the product of the wavenumber and the width.

ANSWER: **finite square well** [or **finite potential well**, or particle in a **finite-walled box**, do NOT accept or prompt on any answer with the word "infinite" or "particle-in-a-box"]

[10] The wavefunctions of the finite square well may be determined using this fundamental equation of quantum mechanics named for an Austrian physicist.

ANSWER: **Schrödinger** equation

[10] Multidimensional infinite square wells acquire this property when more than one dimension of the box has the same length. This property is characterized by having multiple quantum states with the same energy.

ANSWER: **degeneracy**

4. He stated that he would "construct a religion" that would "make use of water" in his poem "Water." For 10 points each:

[10] Name this English poet who wrote "They fuck you up your mum and dad" in his poem "This Be the Verse."

ANSWER: Philip **Larkin**

[10] This Larkin poem speculates on the lives of an earl and countess, who lay "side by side, their faces blurred." This poem concludes "what will survive of us is love."

ANSWER: "An **Arundel Tomb**"

[10] After the death of John Betjeman, Elizabeth II offered Larkin the post of poet laureate, but he turned it down. This author of *The Hawk in the Rain* and *Lupercal* took the post in Larkin's stead.

ANSWER: Ted **Hughes**

5. These mental tools are derived from experience and are often used to overcome “analysis paralysis.” They differ from algorithms in that they are not guaranteed to produce a correct solution. For 10 points each:

[10] Name these mental “rules of thumb” that humans intuitively develop to help solve problems.

ANSWER: **heuristics**

[10] This heuristic, proposed by Kahneman and Tversky, refers to the likeliness of assigning a set of traits to a population that most likely matches the trait set. The taxicab problem demonstrates its fallacies.

ANSWER: **representative** heuristic [Accept word form equivalents]

[10] Many heuristics are subject to these situations, in which judgment suffers from illogical phenomena. Examples include the confirmation one, wherein a subject is more ready to believe information that corroborates his opinion.

ANSWER: **biases**

6. Quintus of Smyrna’s epic poem begins with a description of this warrior-woman. For 10 points each:

[10] Name this Amazon who fought for the Trojans in the Trojan War. After she was killed, her slayer mourned her, probably by having sex with her corpse.

ANSWER: **Penthesilea**

[10] Another fighter for the Trojans was this Ethiopian king, a son of the dawn.

ANSWER: **Memnon**

[10] Both Penthesilea and Memnon were killed by this Greek hero, who also ended up killing Hector.

ANSWER: **Achilles**

7. A dramatic monologue in this play features a woman saying “I’m a good girl. I know how to attract men. I’m tall; I’m striking; I know how to do it.” For 10 points each:

[10] Name this play in which the title figures, A,B, and C, are revealed to be aspects of the same person.

ANSWER: **Three Tall Women**

[10] *Three Tall Women* is a 1995 play by this author, who wrote *Seascape*.

ANSWER: Edward **Albee**

[10] Edward Albee also wrote this play, in which Martha and George invite Nick and Honey after an university party, who witness the atrocity of their deteriorating marriage.

ANSWER: **Who’s Afraid of Virginia Woolf?**

8. *Col legno* strings introduce the ostinato rhythm of this movement, which is in 5/4 time. For 10 points each

[10] Identify this first movement from a larger work, whose other movements depict a “Winged Messenger” and a “Magician.”

ANSWER: “**Mars**, the Bringer of War”

[10] “Mars, the Bringer of War” is the first movement from *The Planets*, which was written by this British composer of the *St. Paul’s Suite*.

ANSWER: Gustav **Holst**

[10] Holst later adapted the second theme from “Jupiter, the Bringer of Jollity” as the tune for this patriotic hymn.

ANSWER: “**I Vow to Thee, My Country**” [accept “**Thaxted**”]

9. Herodotus recounts that this empire was founded by a man named Deioces, who some have linked with Daiaukku. For 10 points each:

[10] Name this ancient empire centered in what is now northwestern Iran. Its greatest ruler, Cyaxares, drove out the Scythians and allied with Babylon to sack Ninevah in 612 BCE.

ANSWER: Medes or Median Empire

[10] The last Median ruler, Astyages, was overthrown by this grandson of his, who founded the Achaemenid Empire. He also allowed the Jews to return home after he conquered Babylon, and proclaimed an early charter of rights.

ANSWER: Cyrus the Great or Cyrus II

[10] The capital of the Medes was this city, which is now Hamadan, Iran. It later became a summer residence for the Achaemenids.

ANSWER: Ecbatana

10. This cycle tends to occur when there's a high multiplicity of infection, or when infected cells are lacking in resources. For 10 points each:

[10] Name this cycle that sees a virus embed itself within its host's genome, which is contrasted with the lytic cycle.

ANSWER: lysogenic cycle

[10] One phage which can switch between the lysogenic and lytic cycles is this one, which has a double-stranded DNA genome, and whose genome contains proteins such as cro and cIII, which help determine which cycle it enters.

ANSWER: lambda phage

[10] The CIII protein of the lambda phage helps prevent CII from being degraded by this compound, which is produced by the host. If CII becomes degraded by this compound, the phage will enter the lytic cycle. It is a membrane-bound ATP-protease whose active site faces the cytoplasm.

ANSWER: FtsH protease [or HflB]

11. You probably shouldn't sign one. For 10 points each:

[10] Name these agreements in which an employer demands the employee to forfeit the right to join a union.

ANSWER: yellow dog contracts [accept clauses or other synonyms for "contracts"]

[10] A 1932 law co-named for this New York politician banned yellow dog contracts. He supported the New Deal policies of FDR during his tenure as mayor of New York.

ANSWER: Fiorello La Guardia

[10] The Erdman Act of 1898 banned yellow dog agreements for workers in this industry, but it was deemed unconstitutional in the *Adair* case. Robert Fogel wrote a book on this industry and the economic growth of the U.S.A.

ANSWER: railroad industry

12. A gentile who follows this man's namesake laws is called "righteous." For 10 points each:

[10] Name this character from the Book of Genesis who rode out a giant flood on his boat along with two of every animal, before landing at Mt. Ararat.

ANSWER: Noah

[10] This son of Noah was the ancestor of Abraham and thus of the nation of Israel. His brothers were Ham and Japheth.

ANSWER: Shem

[10] Genesis claims that this great-grandfather of Noah "walked with God" and did not die but was "taken away." He is the namesake of a non-Canonical Jewish book which tells of the fall of the angelic Watchers and provides visions of the coming history of Israel.

ANSWER: Enoch

13. Tetramethylsilane is defined to have a chemical shift of zero in this technique. For 10 points each:

[10] Name this technique which uses the splitting of spin-states of nuclei in a magnetic field to elucidate the structures of chemical compounds.

ANSWER: Nuclear Magnetic Resonance [accept more specific forms of NMR which reference hydrogen (proton NMR), carbon (¹³C NMR), or silicon (²⁹Si NMR)]

[10] Typical solvents for proton NMR replace hydrogen with this atom, so that the solvent won't produce any peaks in the final spectrum.

ANSWER: deuterium [accept "2H," prompt on "heavy hydrogen," prompt on "D"]

[10] In NMR, this process is used to eliminate inhomogeneities in the magnetic field. This is done by adjusting the electric current flowing through a set of coils placed around the spectrometer.

ANSWER: shimming [accept word forms like "shimmed" Do not accept "shivved," which only happens in prison.]

14. One of this author's novels concerns a woman who is used as a sex slave by French monks. That character is later sexually abused by pretty much everyone before she is struck by lightning and dies. For 10 points each:

[10] Name this author of *Justine*.

ANSWER: Donatien Alphonse Francois, Marquis de Sade

[10] This author wrote a play about the Marquis de Sade, who directs a performance of *The Persecution and Assassination of Jean-Paul Marat* as performed by the inmates of Charenton.

ANSWER: Peter Weiss

[10] The unreadability of Sade and his philosophical thought are interrogated in this author's essay "Must we burn Sade?" *The Mandarins* and *The Second Sex* are other books by her.

ANSWER: Simone de Beauvoir

15. One thought experiment by this man considers lightning that strikes a pond to create a figure called Swampman. For 10 points each:

[10] Name this author of "Mental Events," who argued that mental states may in fact reduce down to physical states, though there doesn't necessarily exist a rule that allows one to infer how they actually reduce.

ANSWER: Donald Davidson

[10] Davidson's position on mental states is an "anomalous" form of this school of thought, which holds that everything in the world, including minds, is composed of one substance.

ANSWER: monism

[10] Davidson also published an article on the "radical" type of this practice, whose indeterminacy is the subject of *Word and Object*.

ANSWER: translation

16. The problem with the fourth version of this protocol is that its address space only provides about four billion namesake address numbers. For 10 points each:

[10] Name this communications protocol that is used to deliver packets on a packet-switched network layer.

ANSWER: Internet Protocol

[10] On the transport layer, this other communications protocol is used for transmitting packets in a reliable and ordered fashion. It uses handshaking to verify that data has been correctly transmitted and is more reliable but more costly than UDP.

ANSWER: Transmission Control Protocol

[10] The standard method provided by TCP for moving data between a network is this protocol. Port 21 and Port 20 of TCP is reserved for this protocol's use of command control and data transfer respectively.

ANSWER: File Transfer Protocol

17. The title character of this opera tries to woo a maid while accompanying himself on the mandolin in “Deh vieni alla finestra.” For 10 points each:

[10] Name this opera whose title character gets dragged down to hell by a statue at the end. Other characters in this opera include the servant Leporello.

ANSWER: Don Giovanni [or Don Juan]

[10] Leporello sings this aria, which claims that his master slept with 1,003 Spanish women, along with significant numbers from other countries.

ANSWER: Madamina, il catalogo è questo [accept the “Catalog” aria]

[10] Figaro and Don Giovanni were both signature roles of this Welsh bass-baritone singer for a time. He recently starred as Wotan in the Met’s new production of the Ring Cycle.

ANSWER: Bryn Terfel

18. Critics derided this man as “British to his bootstraps” due to his extreme monarchism. For 10 points each:

[10] Name this Liberal politician who also tried to ingratiate himself with ordinary citizens by delivering the ‘Forgotten People’ Speech. He was succeeded by Harold Holt.

ANSWER: Robert Menzies

[10] During his time as Prime Minister of Australia, Menzies oversaw the passage of an act giving some of these native Australians the right to vote in elections. They are distinct from the Torres Strait Islanders.

ANSWER: Aborigines or Aboriginal Australians

[10] During the Suez Crisis, Menzies offered to give a radio broadcast in support of this British Prime Minister but his request was denied. This PM’s disastrous handling of the Suez Crisis forced him to resign soon after.

ANSWER: Anthony Eden

19. This author wrote about a man that searches out Zaabalawi because he is struck with an incurable disease in a story from his collection *God’s World*. For 10 points each:

[10] Name this author, who also wrote the novel *Arabian Nights and Days*.

ANSWER: Naguib Mahfouz

[10] Naguib Mahfouz wrote a trilogy of novels named for this city, which details the el-Gawad’s lives in it during the 20th century. That trilogy consists of *Palace Walk*, *Palace of Desire* and *Sugar Street*.

ANSWER: Cairo [accept Cairo Trilogy]

[10] Mahfouz also used Cairo as the setting of this novel, some of whose title figures are Rifa’a, Qasim and Gabal, representations of Christianity, Judaism and Islam.

ANSWER: Children of Gebelawi

20. Two gubernatorial elections have taken place in November 2013. For 10 points each:

[10] In New Jersey, this Republican defeated Barbara Buono. In 2012, he drew criticism from his party for his cooperation with President Obama in the aftermath of Hurricane Sandy, but his response to the disaster was generally well-received.

ANSWER: Chris Christie

[10] New Jersey also elected Cory Booker to fill the vacant Senate seat left by Frank Lautenberg. In the primary, Booker defeated this fellow Democrat, one of only two physicists in congress. His webpage says he’s a Jeopardy! champion.

ANSWER: Rush Holt

[10] The other gubernatorial election took place in Virginia, where this former Democratic party chairman defeated attorney general Ken Cuccinelli.

ANSWER: Terry McAuliffe
